

Covid-19 | Scrummi Spa Best Practice

1. Follow Industry*and Government Advice

- Scrummi Spa means clean, hygienic towelling for each client. Set up your couch and use Scrummi products to create soft, hygienic barriers.
- No cross contamination and zero bacteria concerns.
- Reduces water and electricity usage = better for the environment.
- Explain to your staff and clients why you have chosen Scrummi.

*disposable towelling is recommended by National Hair and Beauty Federation in the UK to ensure maximum hygiene.

2. Correct Use of Scrummi Towels

- Store your sheets, mitts, towels and headbands in a clean, dry environment.
- Keep the products in their carton until the day of use.
- Do not return unused towelling or mitts to the carton.
- At the end of the day, dispose of any Scrummi products which have been removed from the carton. Do not leave exposed in an open atmosphere or return to their carton.

3. Disposal

- After use, immediately dispose any used products into a bag lined, closed bin.
- Do not re-use any Scrummi products on another client or for a secondary purpose (cleaning etc.)
- Do not touch the towelling after they have been placed in the bin.
- When the bin bag is full, tie shut and dispose of with usual salon waste.

#StaySafeWithScrummi
